Charlene -

Sure...I can do this. Schedules are schedules...we will deal with it as it comes...the sites are out there and it's certainly not going to stop any time soon. I just spoke to Suresh Kikkeri of the Army Corps of Engineers to tell him that I would be attending. The meeting location is only about 17 miles (one-way) from my residence so I'll use my POV. The episodic Flexiplace suggestion makes sense. A question for you...although I am already authorized for permanent Flexiplace, do I need to complete a separate form, in advance, for episodic Flexiplace on March 13th? Let me know what else, if anything, I need to do regarding Flexiplace and I'll take care of it. Thanks.

Hi Drew!

Would you be interested in attending? I know that your schedule is starting to get really busy, but this could be somewhat worthwhile. Justin Armstrong from PADEP is attending and he is also working on the Frankford Arsenal site. If you think it may be helpful, the remainder of the day after the meeting could be scheduled as an episodic flexiplace day. Please let me know what you think. Thanks!

John:

Could you please let me know if you (or another person from EPA) would be attending the meeting on the 13 March (from 1000 to 1200)? Thanks

John:

This is a "Formerly Used Defense Site (FUDS)" that is being investigated by the USACE following CERCLA protocol. Although EPA is not the lead on this project, I want to keep EPA in the loop in the decision making process (in addition to PADEP and local government). So, to answer your questions, your presence in the meeting will definitely add value to our discussion. With regard to site visits, I encourage EPA to make at least one or two trips to get an idea of the site. Hope I answered your question.
